

## Stop Spinning Your Wheels – Pinpoint What’s Really Slowing You Down in 30 Minutes

Every stalled initiative drains momentum, burns budget, and frustrates your team. But there’s good news – most stalls can be diagnosed (and reversed) faster than you think.

This guide is your rapid-fire diagnostic to uncover the real reason your project isn’t moving.

### WHAT’S INSIDE

- ✓ A 5-question diagnostic you can run in your next team meeting.
- ✓ A clear view of the warning signs that your initiative is at risk.
- ✓ Simple, practical cues for where to focus next actions.

### WHEN TO USE THIS GUIDE

- ✓ You’re not in every meeting, but you need clarity on why progress is stalled and what actions to take next.
- ✓ You’ve tried multiple solutions without success; discover a new approach to move your project forward.

### WHAT’S NEXT?

Turn the page and start diagnosing your stall.

# How to Root Cause Why Your Initiative is Stuck in the Mud

A tactical checklist to diagnose what's really slowing your strategic projects down.

## ACTION PLAN CHECKLIST: Root Cause Your Stall in 30 Minutes

Use this checklist in your team sync or leadership huddle to surface friction before your initiative drifts further.

**Diagnostic Area**

**Ask This Question First**

**Signals to Watch For**

**Ownership Clarity**

If this project fails, who owns the outcome?

No one clearly responsible, too many hands on decision

**Decision Friction**

What's the last major decision we made - - who made it?

Constant revisiting of project scope or direction.

**Silent Misalignment**

Would our top 3 stakeholders explain this project the same way?

Everyone agrees in meetings, but nothing moves

**Priority Overload**

What would we delay to make this successful?

Project keeps getting bumped for something "more urgent"

**Tooling/ Process Drag**

Project keeps getting bumped for something more urgent.

Slow handoffs, unclear steps, too many approvals

**Tip:** When in doubt, look for silence, circular conversations, or repeated deferrals – those are strong early signals of initiative drift.
